## DETAILED ACTION

### ***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 1-3, 5-7, 9-14 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-6 and 16-21 of copending Application No. 10/766,574. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1616

Claims 1-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of U.S. Patent Nos. 6,740,309; 6,759,029. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Here claims 1-14 are generic to all that is recited in claims of U.S. Patent Nos. 6,740,309; 6,759,029. That is, claims of U.S. Patent Nos. 6,740,309; 6,759,029 fall entirely within the scope of claims 1-14, or in other words, claims 1-14 are anticipated by claims of U.S. Patent Nos. 6,740,309; 6,759,029. Specifically, the compositions and method of producing anti-migraine agents such as rizatriptan and zolmitriptan recited in instant claims 1-14 are anticipated by the composition for delivery and method of producing them as recited in claims of U.S. Patent Nos. 6,740,309; 6,759,029. The rate of particle formation as recited in claims of the instant application are disclosed in the specification of U.S. Patent Nos. 6,740,309; 6,759,029.

Claims 1-14 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of copending Application Nos. 10/735,496 and 10/792,096. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Here claims 1-14 are generic to all that is recited in claims of copending Application Nos. Nos. 10/735,496 and 10/792,096. That is, claims of copending Application Nos. Nos. 10/735,496 and 10/792,096 fall entirely within the scope of claims 1-14, or in other words, claims 1-14 are anticipated by claims of copending Application Nos. Nos. 10/735,496 and 10/792,096. Specifically, the compositions and method of producing

Art Unit: 1616

anti-migraine agents such as rizatriptan, zolmitriptan recited in instant claims 1-14 are anticipated by the method of administering an antimigraine and the kit comprising the composition and a device of copending Application Nos. Nos. 10/735,496 and 10/792,096.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
